## **DETAILED ACTION**

### ***Response to Amendment***

This Office Action is in response to the Preliminary Amendment filed on July 10, 2003.

Accordingly, claims 21-75 were canceled.

Currently, claims 1-20 are pending in the application.

### ***Specification***

The title of the invention is not descriptive. A new title is required that is clearly indicative of the invention to which the claims are directed.

The following title is suggested: METHOD OF FORMING HIGH COUPLING SPLIT-GATE TRANSISTOR.

Appropriate correction is required.

### ***Claim Objections***

Claim 1 is objected to because of the following informalities: line 11 to 12, "the plurality of spacers" should be --the plurality of polysilicon spacers-- for clarity.

Appropriate correction is required.

### ***Statutory Type Double Patenting***

A rejection based on double patenting of the "same invention" type finds its support in the language of 35 U.S.C. 101 which states that "whoever invents or discovers any new and useful process ... may obtain a patent therefor ..." (Emphasis added). Thus, the term "same invention," in this context, means an invention drawn to identical subject matter. See *Miller v. Eagle Mfg. Co.*, 151 U.S. 186 (1894); *In re Ockert*, 245 F.2d 467, 114 USPQ 330 (CCPA 1957); and *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970).

A statutory type (35 U.S.C. 101) double patenting rejection can be overcome by canceling or amending the conflicting claims so they are no longer coextensive in scope. The filing of a terminal disclaimer cannot overcome a double patenting rejection based upon 35 U.S.C. 101.

Art Unit: 2822

Claims 1-20 are rejected under 35 U.S.C. 101 as claiming the same invention as that of claims 1-20 of prior U.S. Patent No. 6,323,085. This is a double patenting rejection.
